At page 11 lines ~~12-14~~, thru the top of page 12, change the paragraph to read as follows:

Currently all LINC systems are generated by the host-based LINC (133) Fig. 18 Development Environment (LDE) from specifications kept in its repository. The specifications ~~[[ (113) ]]~~ (133) Fig. 18 can be entered directly into the repository using the host-based editor and painter (134) or they can be prepared in the PC-based LDA environment (Fig. 18, 130) and loaded in using the CaseLoad utility (131) via an LDE repository in Lcopy format and loaded back in to the same or another host-based repository.
